

# PURE

# ONLY THE PUREST AIR WILL DO

Sometimes you need air so clean that it's out of this world, CAD/CAM milling for example. That's why Cattani made a compressor that delivers its purest air yet, specifically to meet the demands set by CAD/CAM manufacturers. Because out of this world is what we do.

## HAVE CONFIDENCE IN CATTANI

For more than 50 years, Cattani's global business has been dental air technology – no distractions. We stand for quality, performance and reliability with the aim of keeping laboratories and dental practices running day after day, year after year – and mill after mill.

Cattani and its sister company Esam supplied the air technology for the NASA space shuttle, designing a tiny, 180gm compressor able to maintain a pressure of 38 bar.

**The Cattani AC310 is the ideal  
compressor for precision CAD/CAM  
milling, setting the standard for  
power, air quality and performance**

**Power** – purpose-built to maintain a constant and sustainable operating pressure of 8 bar over long CAM cycles to ensure optimal mill performance.

**Air quality** – the AC310 sits comfortably within ISO standards with a 99.97% efficiency rating for particles greater than 0.3 microns, and so preventing damage to your valuable equipment and precious work.

**Performance** – our compressors run and run. They're easy to install, low maintenance and the AC310 is particularly robust. And nothing says reliability like a 7-year warranty.

# CAD/CAM compressors by Cattani

- Ultra clean, dry, oil-free air
- Power for the purpose
- Super robust and reliable
- Minimal maintenance
- Sound reduction option – AC310Q
- Internal tank coating ensures patient safety
- Unrivalled technical service back-up
- Industry-leading 7-year warranty

**WE LOVE WHAT WE DO.**

**Need a CAD/CAM compressor?  
You need the Cattani AC310.**

Pure air + Optimum power = Pure performance

**You'll like the atmosphere at Cattani**
