

PURE

ONLY THE PUREST AIR WILL DO

Sometimes you need air so clean that it's out of this world, CAD/CAM milling for example. That's why Cattani makes compressors that deliver our purest air yet, specifically to meet the demands set by CAD/CAM manufacturers. Because out of this world is what we do.

Have Confidence in Cattani

For more than 50 years, Cattani's global business has been dental air technology – no distractions. We stand for quality, performance and reliability with the aim of keeping laboratories and dental practices running day after day, year after year – and mill after mill.

Cattani and its sister company, ESAM, supplied the air technology for the NASA space shuttle, designing a tiny, 180gm compressor able to maintain a pressure of 38 bar.

Cattani's CAD/CAM compressor range is ideal for precision milling, setting the standard for power, air quality and performance.

Power – purpose-built to maintain a constant and sustainable operating pressure of 8 bar over long CAM cycles to ensure optimal mill performance.

Air quality – Cattani CAD/CAM compressors sit comfortably within ISO standards with a 99.97% efficiency rating for particles greater than 0.3 microns, preventing damage to your valuable equipment and precious work.

Performance – our CAD/CAM compressors – AC210, AC310, AC410, AC610 and AC910 – run and run. They're easy to install, low maintenance and particularly robust. And nothing says reliability like a 7-year warranty.

CAD/CAM compressors by Cattani

- Ultra clean, dry, oil-free air
- Power for the purpose
- Super robust and reliable
- Minimal maintenance
- Further sound reduction options across the range
- Internal tank coating ensures patient safety
- Unrivalled technical service back-up
- Industry-leading 7-year warranty

WE LOVE WHAT WE DO.

Need a CAD/CAM compressor? You need Cattani.

Pure air + Optimum power = Pure performance
